

DELAWARE COMPENSATION RATING BUREAU, INC.

Internal Rate of Return Model

The attached pages present exhibits and a description of the internal rate of return model used in deriving the DCRB loss ratio (including loss adjustment expenses and loss-based assessments) and provision for profit and contingencies.

DELAWARE COMPENSATION RATING BUREAU, INC.

DELAWARE DECEMBER 1, 2020 RESIDUAL MARKET RATE FILING

Internal Rate of Return Analysis

The following pages present results of an economic analysis establishing the following items:

- The appropriate rate of return for writing workers compensation business, and
- The loss ratio (including loss adjustment expenses and loss-based assessments) which will allow the realization of that target rate of return in current economic conditions, based on current expense needs for stock carriers and cash flows for losses and expenses attendant with Delaware workers compensation insurance.

Internal Rate of Return Table I shows Inputs, Assumptions and Outputs underlying the analysis.

Internal Rate of Return Tables II - VII show the various cash flows projected for the underwriting of Delaware workers compensation business based on the inputs to the Internal Rate of Return model, assuming a base standard premium at DCRB level of \$1 million.

Exhibits titled "Delaware Pre & Post Tax Returns" and "Delaware Cost of Capital" present the derivation of the appropriate current target rate of return, which is 10.35 percent. Both Capital Asset Pricing Model ("CAPM") and Discounted Cash Flow ("DCF") analyses have been applied in the derivation of this target rate, producing results of 8.51 and 10.70 percent, respectively. The selected target rate of return, 9.61 percent, is the average of these two separate indications.

INTERNAL RATE OF RETURN ANALYSIS
STATE OF DELAWARE - 2020
TABLE I: INPUTS, ASSUMPTIONS & OUTPUTS

Section 1: Inputs & Assumptions		
(1) Commissions *		5.45
(2) Other Expenses		5.20
(2A)	Other Acquisitions *	2.04
(2B)	General Expenses *	2.84
(2C)	Other Tax **	0.32
(3) State Premium Taxes & Uncollectible Premium		
(3A)	Tax1 - Premium Tax **	2.00
(3B)	Uncollectible Premium **	2.30
(3C)	Tax3 - Workers Compensation Fund **	2.00
(4) Premium Discount ***		8.59
(5) Deviations		0.00
(6) Dividends to Policyholders		0.00
(7) Premium Written		1,000,000
Investment Income		
(8A)	Pre-Tax Return on Assets	4.13
(8B)	Investment Income Tax Rate	0.68
(8C)	Post-Tax Return on Assets	3.45
(10) Reserve to Surplus Ratio		1.86
(11) Internal Rate of Return (Cost of Capital)		9.61
* Applies to standard premium at DCRB level (before premium discount)		
** Applies to net premium at company level (after deviations and premium discounts)		
*** Applies to standard premium at company level (after deviations)		

Section 2: Outputs	
(1) Loss Ratio - including loss adjustment expense & loss based assessments	71.86
(2) Profit & Contingencies	2.60

**INTERNAL RATE OF RETURN ANALYSIS
EXPLANATORY NOTES**

TABLE II: CASH FLOW PATTERNS

Column (1)	Premium Collection pattern provided by the DCRB based on Delaware workers compensation data.
Column (2)	Policy Year Loss Payout pattern provided by the DCRB based on Delaware workers compensation data.
Column (3)	Other Expense Payout pattern as follows: All expenses except Commission and 1/2 General Expense flowing with earned premium. Commission flows with collected premium, and 1/2 General Expense flows with written premium.
Column (4)	Tax 1 flow assumes even quarterly payment of state premium taxes.
Column (5)	Uncollectible premium flow matches that of Column (1) – Premium collection pattern.
Column (6)	Tax 3 flow assumes even quarterly payment of Security Fund assessments.
Column (7)	No dividend provision is included in this IRR model.

**INTERNAL RATE OF RETURN ANALYSIS
EXPLANATORY NOTES**

**TABLE III: CASH FLOW FOR LOSS AND UNEARNED PREMIUM RESERVES
PAGE 1**

Column (1) Premium Collected based on collection pattern from Table II, Column (1).

Example: $\$914,100 \times .000023 = \21.02

Column (2) Agents' Balances reflects the difference between Written Premium and Collected Premium. Written Premium pattern provided by the DCRB for Delaware workers compensation insurance.

Example: Written Premium, First Quarter = $.25 \times \$914,100 = \$228,525.00$
Collected Premium = $(.000023 + .002135) \times \$914,100 = \$1,972.63$
Written - Collected = $\$226,552.37$

Column (3) Overdue Agent's Balances are all Agents' Balances due after the end of the 24-month period in which earnings of policy year premium occurs.

Column (4) Admitted Agents' Balances reflect all Agents' Balances due prior to the end of the 24-month period in which earnings of policy year premium occurs.

Column (5) Losses Incurred is computed by applying the loss ratio for the business to earned premiums at DCRB level (i.e., before premium discounts). Premium earning pattern provided by the DCRB for Delaware workers compensation insurance.

Example: $.7186 \times \$1,000,000 \times .0325 = \$23,354.50$

Column (6) Unearned Premiums is computed as Cumulative Written Premium less Cumulative Earned Premium.

Example: $\$238,031.64 - 29,708.25 = \$208,323.39$

Column (7) Total Premium Net of Reserves is computed as Collected Premium plus Admitted Agents' Balances less Losses Incurred less Unearned Premium Reserves.

Example: $\$1,972.63 + 226,552.37 - 23,354.50 - 208,323.39 = -\$3,152.89$

**INTERNAL RATE OF RETURN ANALYSIS
EXPLANATORY NOTES**

**TABLE III: CASH FLOW FOR LOSS AND UNEARNED PREMIUM RESERVES
PAGE 2**

Column (8) Premium Net of Reserves is the periodic change in Column (7).

Example: $-\$3,152.89 - 0 = -\$3,152.89$

Column (9) Cumulative Written Premium is total written premium times the cumulative written premium distribution (Table II, column (8)).

Example: $\$914,100 \times .2604 = \$238,031.64$

Column (10) Cumulative Earned Premium is total earned premium times the cumulative earned premium distribution (Table II, column (9)).

Example: $\$914,100 \times 0.0325 = \$29,708.25$

**INTERNAL RATE OF RETURN ANALYSIS
EXPLANATORY NOTES**

**TABLE IV: TAX CREDITS AVAILABLE FROM UNDERWRITING OPERATIONS
PAGE 1**

Column (1) The net written premium underlying the model, i.e., \$1 million less premium discounts, or \$914,100.00.

Column (2) The periodic change in the Unearned Premium Reserve shown in Table III, Column (6).

Example: $\$435,203.01 - 0 = \$435,203.01$

Column (3) The sum of the products of the expense flows shown in Table II and their associated expense provisions as shown on Table I, multiplied times the premium base.

Example:

Item	Provision (%)	Year 1 Expense Flow	Year 1 Expense Ratio %	Premium Base	Year 1 Expense \$
	(a)	(b)	(c)=(a)*(b)	(d)	(e)=(c)*(d)
Commission	5.45	0.002706	0.014748	1,000,000	14,747.70
General Expense	2.84	0.007500	0.021300	1,000,000	21,300.00
Other Acquisition	2.04	0.010000	0.020400	1,000,000	20,400.00
Other Tax	0.32	0.010000	0.003200	914,100	2,925.12
Uncollectible Prem	2.30	0.002706	0.006224	914,100	5,689.18
Tax 1:	2.00	0.010000	0.020000	914,100	18,282.00
Tax 3:	2.00	0.010000	0.020000	914,100	18,282.00
Total					101,626.00 (round)

Column (4) & Column (5) The Losses Paid for Accident Years 1 and 2, respectively, are based on payout patterns provided by the DCRB for Delaware workers compensation insurance.

Example: Accident Year 1, Year 1 Payout

$$(.1256 / 2) \times .7186 \times \$1,000,000 = \$45,128.08$$

**INTERNAL RATE OF RETURN ANALYSIS
EXPLANATORY NOTES**

**TABLE IV: TAX CREDITS AVAILABLE FROM UNDERWRITING OPERATIONS
PAGE 2**

Column (6) The IRS Discount Factors are a tabulation of discount factors published for carriers by the Internal Revenue Service.

Column (7) & Column (8) The Losses Discounted for Accident Years 1 and 2, respectively, are the change in discounted reserves for each accident year implied by the loss ratio, premium earnings pattern and IRS discount factors incorporated into the model.

Example: Accident Year 1, Year 2 Losses Discounted

Accident Year 1 Incurred at End of Year 2: \$376,474.54

Accident Year 1 Paid Through Year 2:

$\$45,128.08 + 85,190.03 = \$130,318.11$

Accident Year 1 Undiscounted Reserve, Year 2:

$\$376,474.54 - 130,318.11 = \$246,156.43$

IRS Discount Factor: .8596

Accident Year 1 Discounted Reserve, Year 2:

$\$246,156.43 \times .8596 = \$211,596.07$

Accident Year 1 Incurred at End of Year 1: \$376,474.54

Accident Year 1 Paid Through Year 1: \$45,128.08

Accident Year 1 Undiscounted Reserve, Year 1:

$\$376,474.54 - 45,128.08 = \$331,346.46$

IRS Discount Factor: .8752

Accident Year 1 Discounted Reserve, Year 1:

$\$331,346.46 \times .8752 = \$289,998.73$

Change in Discounted Reserves, Year 1 to 2:

$\$211,596.07 - 289,998.73 = -\$78,402.66$ (round)

Column (9) Tax Credits are computed as follows:

Underwriting Tax Rate x

(- Written Premium
+ 0.8 x Change in Unearned Premium
+ Expenses Paid
+ Losses Paid
+ Change in Discounted Loss Reserve)

TABLE V: NET CASH FLOWS FROM UNDERWRITING

Column (1)	The Premium Flow Net of Reserves is Column (8) of Table III.
Column (2)	Tax Credits from Underwriting is a quarterly flow of those credits in Column (9) in Table IV.
Column (3)	Expenses show a quarterly flow of Expenses prepared in the same fashion as the annual flows in Column (3) of Table IV.
Column (4)	Dividends are not used in this model as no provision has been made for dividends in this analysis.
Column (5)	Net Cash Flow from Underwriting is computed by adding Column (1) and Column (2) and subtracting Column (3).

**INTERNAL RATE OF RETURN ANALYSIS
EXPLANATORY NOTES**

TABLE VI: DERIVATION OF FUNDS IN SURPLUS ACCOUNT

Column (1) Loss and Loss Adjustment Reserves is the difference between Losses Incurred (Column (5), Table III) and Losses Paid (Columns (4) and (5), Table IV).

Example: $\$376,474.54 - 45,128.08 = \$331,346.46$

Column (2) Unearned Premium Reserves is Column (6) of Table III.

Column (3) Admitted Agents Balances is Column (4) of Table III.

Column (4) Cash Level is computed by adding Columns (1) and (2) and subtracting Column (3).

Example: $\$331,346.46 + 435,203.01 - 666,701.58 = \$99,847.89$

Column (5) Funds in Surplus Account is derived by adding Columns (1) and (2) and dividing that total by the reserve-to-surplus ratio used in the model, in this case, 1.86.

Example: $(\$331,346.46 + 435,203.01) / 1.86 = \$412,123.37$

INTERNAL RATE OF RETURN ANALYSIS

EXPLANATORY NOTES

TABLE VII: NOMINAL CASH FLOWS TO INVESTORS

Column (1)	Net Cash Flow Underwriting is Column (5) of Table V.
Column (2)	Cash Pre-Tax Income is computed by multiplying the pre-tax investment yield rate times the periodic average Cash Level from Column (4), Table VI. Example: $(\\$71,757.28 + 99,847.89) / 2 = \\$85,802.59$ $\\$85,802.59 \times .041264436 / 4 = \\885.15
Column (3)	Cash Income Taxes is computed by multiplying the investment income tax rate times the periodic average Cash Level from Column (4), Table VI. Example: $(\\$71,757.28 + 99,847.89) / 2 = \\$85,802.59$ $\\$85,802.59 \times .00677009 / 4 = \\145.22
Column (4)	Net Flow from Surplus is the periodic change in Surplus Balance posted in Column (5) of Table VI. Example: $\\$345,221.40 - 412,123.37 = -\\$66,901.97$
Column (5)	Surplus Pre-Tax Income is computed by applying the pre-tax investment yield to average periodic surplus balance computed from Column (5) of Table VI. Example: $(\\$345,221.40 + 412,123.37) / 2 = \\$378,672.38$ $\\$378,672.38 \times .041264436 / 4 = \\$3,906.43$
Column (6)	Surplus Income Taxes is the product of the investment income tax rate and the average periodic surplus balance computed from Column (5) of Table VI. Example: $(\\$345,221.40 + 412,123.37) / 2 = \\$378,672.38$ $\\$378,672.38 \times .00677009 / 4 = \\647.32
Column (7)	Net Cash Flow is the sum of Columns (1) through (6) and represents the net flows to investors which result in a rate of return of 9.61 percent to investors in the insurance company as required by the Internal Rate of Return Model. Example: $\\$48,427.13 + 885.15 - 145.22 - 66,901.97 + 3,906.43 - 640.91 = -\\$14,469.40$

INTERNAL RATE OF RETURN ANALYSIS EXPLANATORY NOTES

DELAWARE PRE & POST TAX RETURNS PAGE 1

Column (1)	Invested Assets Categories taken from Best's Aggregates and Averages with values as of December 31, 2018.
Column (2)	12/31/18 Market Values Treasuries, Exempt Bonds, Bonds for Unaffiliated and Affiliated Companies, Preferred Stock for Unaffiliated and Affiliated Companies and Common Stock for Unaffiliated and Affiliated Companies all taken from 2019 Best's Aggregates and Averages, Industry Total Schedule D.
Column (3)	Pre-Tax Return The yields shown are an average of the July, 2019 yields from the December 1, 2019 Rate and Loss Cost filing and the July, 2020 yields, which come from the following sources: Treasuries based on yields by Maturity published in Federal Reserve Statistical Release H. 15 (July 14, 2020), weighted by loss payout pattern provided by the DCRB for Delaware workers compensation insurance. Exempt Bonds based on yields by Maturity published in Bond Buyer, Municipal Market Statistics (July 14, 2020). Bonds based on yields published by the Federal Reserve Bank of St. Louis (July 15, 2020 with latest available data from June, 2020). Preferred stock yields based on Dividend Yield Hunter (July 15, 2020). Common Stock Yield based on three-month Treasury Bill rate (Federal Reserve Statistical Release H. 15 (July 14, 2020)) plus Ibbotson Differential (2020 Ibbotson SBBI). Mortgages based on yields published by the Federal Reserve Bank of St. Louis (July 16, 2020). Real Estate Yield based on three-month Treasury Bill rate (Federal Reserve) plus Ibbotson Differential (Ibbotson & Seigel, AREUA Journal, Vol 12, No. 3, 1984). Cash & Short Term Investment yield based on the Federal Funds (effective) rate, as published in Federal Reserve Statistical Release H. 15 (July 14, 2020).
Column (4)	Investment Gain Product of 12/31/18 Market Value times Pre-Tax Return expressed as a decimal value by asset type.

INTERNAL RATE OF RETURN ANALYSIS EXPLANATORY NOTES

DELAWARE PRE & POST TAX RETURNS PAGE 2

Column (5) Tax Rate
(Percent Taxable x .21) + ((1.0 - Percent Taxable) x .25 x .21)

Percent Taxable Treasuries, Unaffiliated Bonds, Mortgages & Real Estate and Cash & Short Term Investments all assumed to be 100 percent taxable.

Exempt Bonds, Bonds in Affiliated Companies and Preferred Stock in Affiliated Companies all assumed to be tax-free.

Preferred Stock in Unaffiliated Companies: 50 percent of dividend income taxable per Tax Cuts and Jobs Act of 2017; all income attributed to dividends for preferred stock.

Common Stock of Affiliated Companies: 100 percent of capital gains in affiliated companies subject to income tax per Tax Reform Act of 1986. Portion of common stock income attributed to capital gains is 0.6695. 25 percent of the otherwise exempt portion (0.3305) is subject to tax.

Common Stock of Unaffiliated Companies: Capital gains are taxed at the full rate, 50 percent of dividends are taxed at the full rate, and 25 percent of the remaining dividends (50 percent) are subject to tax. $(0.6695 \times 0.21) + (0.50 \times 0.21 \times 0.3305) + (0.50 \times 0.3305 \times 0.25 \times 0.21) = 0.1840$. Portions of common stock income attributable to dividend and capital gains from Duff & Phelps' 2020 SBBI Ibbotson (Large Company Stocks, Arithmetic Mean).

Column (6) Post Tax Return
Pre-Tax Return x (1.0 - Tax Rate)
