## DCRB Information Bulletin #029

To all members of the DCRB:

### **RE: Delaware Insurance Plan Manager (DIPM) Application User Interface Updates**

The DCRB has completed a few visual updates to the DIPM (Delaware Insurance Plan Manager) application screen. These changes were implemented as of February 9, 2026. These updates do not change how the application functions; rather, they improve how information is displayed to better align with the underlying premium calculation logic.

#### **Premium Calculation Display Enhancements**

The premium calculation block has been reordered to more closely follow the calculation algorithm. This allows agents and employers to more easily track how the premium is developed as information is entered.

Specific display changes include:

- Clear display of the minimum premium charge
- Placement of the non-ratable premium below the *Premium After Merit Rating/Mod* field
- Placement of the premium discount after the *Total Standard Premium* field
- Addition of sub-total fields to enhance transparency and readability

These changes are intended to improve clarity and navigation while completing applications.

#### **Admiralty Class Display Update**

A new field has been added to allow for the display of an Admiralty class, when applicable.

- This field will appear only when an admiralty class has been applied

- It will not be visible on applications where admiralty coverage is not relevant

For questions related to these updates, users should contact the Delaware Insurance Plan support team via [dipm@dcrb.com](mailto:dipm@dcrb.com) or (215) 320-4420.
